

Please continue to protect my privacy from telemarketers. I don't want these unsolicited calls in my home OR on my cell phone.

Indiana's Telephone Privacy law has RETURNED my evenings to myself. Allowing ME to use MY phone as I WISH and not receive multiple unwanted calls.

The FCC should not implement any proposal that would lessen or change the current Indiana Telephone Privacy law protections.

I enjoy my quiet evenings now. I work in an office with 9 lines ringing all day. I certainly don't want to come home to telephone solicitations.

It is important to me, as well as the other citizens of Indiana to continue with our telephone privacy laws. This is something that we were all thrilled to get into action. Finally, something to give back to the people, instead of taking away from us. Please allow us to continue receiving and maintaining our privacy and quiet phones. Don't change our laws. Let us continue in the peace and quiet of our evenings at home following a hard day's work.

Thank you for considering my viewpoints.

Have a nice day.
M. Westerfield
